

VoxIP

Windstream VoxIP service expands your broadband solution through the dynamic exchange of voice and Internet. While conventional telecommunications require separate channels for voice and Internet, VoxIP enables the channels on your T1(s) to switch between voice and Internet as your call volume needs dictate.

Even with 24 calls in progress simultaneously per T1, Windstream is still able to guarantee a minimum of 768 Kbps, or about one half of a T1 of Internet bandwidth, for your Internet applications.

With VoxIP, your business begins with T1(s) of Internet and adds the voice and networking service you need up to 100 Mbps of bandwidth and 96 voice lines. You may also select from a collection of enhanced features designed to provide greater flexibility and more efficient telecommunications service for your business.

Windstream's VoxIP couples new innovations with proven, reliable technology.

To learn more about how your business can enjoy the ease and flexibility of VoxIP, contact your Windstream Representative.

Features

- **Flexibility:** Windstream's platform supports a wide variety of services which include voice lines, PRIs, SIP, and high bandwidth applications.
- **Dual Usage:** Channels on the T1 alternate "on demand" between data and voice.
- **Voice Prioritization:** Calls coming into and going out of your business always receive priority.
- **Robust Feature Packages:** Select from feature packages that include free long distance, reservationless conferencing, local calling features, messaging services, web hosting, email, and managed Internet security.

Advantages

- **Easy-to-use Customized Portal:** Easily monitor your call logs, store contact information, and update your individual call features at any time using your Internet connection.
- **Free Calling Between Locations:** Customers receive free domestic long distance between VoxIP locations.
- **Quality of Service:** Windstream leverages its state-of-the-art, fully-redundant IP network and on-premise integrated access devices to ensure the highest quality of service.
- **Future-Proof Your Network:** VoxIP works with your current equipment today, while providing the foundation to upgrade to more advanced systems in the future.
