

WebHosting

Windstream WebHosting service is a “parking space” for your website. We offer a shared hosting solution, which means your website will reside on our secure servers that are maintained and monitored 24x7.

And, you can make changes to your website content as often as you like from the Windstream web-based management tool.

Windstream offers several WebHosting plans, so you can customize your WebHosting solution to your business needs.

To learn more about how your business can benefit from WebHosting, contact your Windstream Representative.

Features

- Packages with 40 to 150 Mb storage space and 1,000 to 6,000 Mb/month data transfer
- CGI via PHP/Perl (Windows NT also supports ASP)
- Domain Name Registration
- SSL Security Certificate
- Microsoft FrontPage Support
- Database support (MySQL, MS SQL 7, and Access) and Cold Fusion available for larger websites

Advantages

- **Simple:** It's easy to establish and maintain your web presence.
- **Easy-to-Use:** Manage your account online through WebHosting Control Panel (24x7 access).
- **Comprehensive:** Analyze your website's performance by tracking the number of visitors to your website, where they came from, and what pages they viewed.
- **Reliable:** Your website is backed up daily to save your data.
