

Dedicated Internet

Dedicated Internet offers a private, non-shared solution. For businesses that rely on heavy Internet usage for their daily operations, Kinetic Business offers a Dedicated Internet solution that is much more robust than Business Class Internet or cable data connections.

FEATURES:

Avoid congestion experienced on shared Internet connections.

Symmetrical upload and download speeds.

Consistent speed throughout the day not impacted by peak Internet usage periods.

Highly dependable and redundant infrastructure, with 24-hour network monitoring.

Full range of bandwidth options to give you maximum flexibility.

Connect remote employees or multiple locations to your network using VPN.

Available speeds up to 1GB/1GB with Static IP addresses.

BENEFITS:

Never compete for bandwidth thanks to dedicated, non-shared Internet access.

Alleviate the worry of an outage with our Service Level Agreement, which guarantees 99.99% uptime.

Transfer sensitive information via a private connection.

A private Internet connection for increased security when transferring sensitive data.

High-speed connectivity enables your business to send and receive large amounts of data, conduct video conferences, run web-based applications, stream video and provide multi-site access.

Same speed for both upload and downloads increases productivity.

Stream video and utilize video services.

24/7 U.S.-based technical support with priority treatment for business.

For businesses with mission critical data and zero tolerance for downtime, you'll find Kinetic Business Dedicated Internet gets the job done. Our Service Level Agreement (SLA) guarantees you 99.99% uptime.
