# Fuel the future of your business with fiber.

Gain a competitive edge with lightning-fast, reliable internet.

Opportunity starts with reliability.

In a global economy, small businesses like yours are still the backbone of community and commerce. Reports show that **91% of American shoppers patronize small and local stores**[1] for the friendly, personalized service and to help support local merchants and economies. In all, consumers spent about **$3.74 trillion**[1] at small stores in 2024.

Don't let unreliable internet hold you back. Take advantage of the best technology the industry has to offer—a fiber internet connection that is 99.9% reliable, inherently more secure than cable internet or DSL, and helps all your systems run smoothly.

FIBER INTERNET ENABLES GREAT CUSTOMER EXPERIENCES AND KEEPS YOUR BUSINESS MOVING WITH:

- **Dependable connections for POS:** Payment systems run smoothly and securely so you never miss a sale.

- **Engaging guest Wi-Fi:** Showcase personalized offers and promotions, and keep customers engaged and happy while they wait.

- **Enhanced communication and collaboration:** Equal upload and download speeds enable your staff to work quickly and efficiently.

- **Streamlined operations management:** Cloud-based systems are fast and efficient so you can track inventory in real-time, process payroll, and manage customer orders with ease.
